

## FRAMES

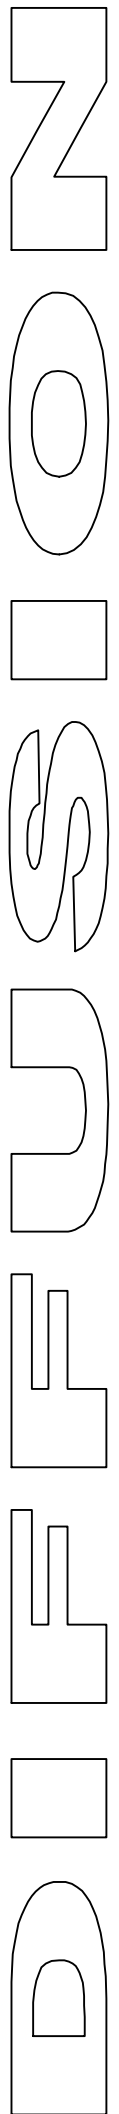

# AFIX 12mm

AFIX 12mm is a square profile aluminium poster-holder, which stretches a poster tight by its 4 corners thanks to a system of springs and clips. Very light and easy to dismantle, it is suitable for all types of posters. Allows double-sided use.

**Universal frame functioning by spring tension, a top of the range item more particularly adapted to medium to large size posters**

**Robust aluminium rods available in silver or gloss - in a range of 7 colours**

## Wall mounting

2 concrete nails are supplied with your frame. All you need to do is position the nails at each end of the frame and hang it onto them.

The lightness of the frame makes it easy to set up for lasting installation.

## Shop window mounting

You will be able to use our

suction grip hooks, applied beforehand, onto a window, mirror or glass door, etc.

All you will need to do then is rest the frame's outer rod on the hooks.

Your frame will be very easily moved.

## Aerial suspension

All our models of frames can be hung down from adjustable hooks. They are very easy to set up thanks to an adhesive support, either hanging down from the ceiling or on the shop window sill.

No extra cost for setting the frames up

Assembling and dismantling are very easy. The frames are compact enough to give maximum mobility.

## Free-standing

The base system composed of two 12mm tubes with clip fittings and two round bases gives excellent stability. Recommended for large formats

The round plastic base comes in a range of different colours and adapts to our 3 models of frames. Double-sided use. Colour : black, blue or transparent green.

A small or medium sized frame (A4 or A3 formats) can be placed on a central post. Easy to set up and carry
